

Medicare Part D Retiree Drug Subsidy Assessment

Why a Subsidy Assessment?

Large, timely and accurate Retiree Drug Subsidy (RDS) payments are the goal of any Plan Sponsor. A Retiree Drug Subsidy Assessment is the best way to test the accuracy of a Plan Sponsor's subsidy payment requests. The RDS website allows Plan Sponsors and their assigned designees to view member eligibility and plan costs. Using this crucial data, Part D Advisors performs an estimation of the proper amount of a Plan Sponsor's subsidy payments. In addition, Part D Advisors will identify discrepancies that occur with eligibility and cost reports.

Post Assessment Report

After the data is obtained and analyzed, Part D Advisors conveys an easy-to-understand Assessment Report to the Plan Sponsor and their consultants. The report includes areas where Part D Advisors suspect the Plan Sponsor is under or over reporting retirees and drug claims, improperly calculating subsidy payments and any issues the Plan Sponsor may face with completing Final Reconciliation for their subsidy application.

Benefits of a Subsidy Assessment

When Part D Advisors pinpoints any problems and corrects them, the process leads to more accurate cost reports and usually higher subsidy recoveries.
